

Business Cyber Protection Services

Protect Your Business

World Class Cyber Protection, Response and Recovery Services

You are focused on your business' growth and success. You may not be paying attention to the security of your business data, but cyber criminals are. Sixty percent of all small businesses that experience a cyber breach are out of business within a year.

Our Commercial Cyber Services fully integrate leading 24/7/365 cyber services and dark web scanning, hacking monitoring and alert technology to better protect your business against data and privacy breaches, including ransomware and malware. We provide an intuitive and comprehensive cyber solution that can be implemented in minutes to better protect your business against cyber attack.

Is your business doing everything you can?

28% of data breaches each year occur at small businesses.

A Better Approach To Cyber Protection

Commercial Cyber Services include five ongoing phases that integrate cyber scanning, monitoring and alerts with intuitive on-line resources and live cyber advocacy to better and more simply protect your business.

1. **Assess** - You run a quick dark web scan on your business domain(s) to better identify where your corporate data has been breached.
2. **Enhance** - Based on your scan results, resources are provided to better plan, train your employees and protect your data and network against cyber attack.
3. **Respond** - Experienced Cyber Advocates are available 24/7/365 to help your business respond to a cyber attack. Ongoing monitoring of your domain(s) is active.
4. **Recover** - Post cyber event, we provide you with guidance on how to recover from the cyber event and get back to business as normal.
5. **Support** - Timely cyber updates and reference are provided to your business on the latest cyber threats.

Comprehensive Commercial Cyber Services may be used with your existing or new commercial cyber policy to better mitigate risks and improve response to cyber attacks.
